

# LUCIDEON TECHNOLOGY PARTNERSHIPS

## INFORMATION ASSOCIATE PACKAGE FOR THE HEAVY CLAY SECTOR

If you are a manufacturer or a supplier of products or materials, looking to improve your performance and profitability, a Lucideon Technology Partnership package can help you to do just that through our cross-industry expertise, problem solving capabilities and knowledge exchange.

We work as an extension of your team to help you make a profit in a highly competitive market, working to give you a competitive advantage, access to the latest industry information, provide you with network opportunities and technical guidance drawn on years of our industry experience.

Our Technology Partnership services support and create value for your organisation through unique insights, resources and innovation.

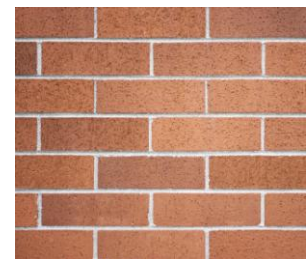

With our materials expertise, extensive testing facilities, knowledge of current regulations and industry experience, we are able to work with raw material producers, manufacturers, designers, contractors, building managers and end-users to optimise performance of materials, buildings and structures.

Lucideon represents the UK on a number of construction related standards and regulatory committees, including CEN (Committee for European Standardisation) and BSI (British Standards Institution). From this involvement we are able to offer up-to-date advice and guidance on standards and the regulatory and legislative framework connected with the construction sector, such as the European Code of Practice for the design of masonry and the European Standards for masonry units, mortars and ancillary components. Lucideon is a Notified Body for testing a wide range of products covered by the Construction Products Directive for CE marking purposes.
